

Sutton Consulting International Limited Joins the UNEP Global Mercury Partnership

13 February 2026

Sutton is proud to announce its official registration as a partner of the United Nations Environment Programme (UNEP) Global Mercury Partnership, marking an important milestone in the company's commitment to environmental sustainability and public health protection.

On behalf of UNEP, Sutton has been formally welcomed as a new partner in the Global Mercury Partnership, a collaborative initiative dedicated to addressing one of the world's most pressing environmental challenges.

The overarching goal of the UNEP Global Mercury Partnership is to protect human health and the global environment from the releases of mercury and its compounds by minimizing and, where feasible, ultimately eliminating global, anthropogenic mercury releases to air, water, and land.

“We are honoured to join the UNEP Global Mercury Partnership and to collaborate with global stakeholders working toward the responsible management and reduction of mercury emissions. This partnership aligns strongly with our mission to support sustainable development, evidence-based policy, and environmental protection initiatives across sectors.” said Ben Smit, Sutton Group CEO.

Through its participation in the Partnership, Sutton will contribute its expertise to advance international efforts aimed at reducing mercury risks, supporting regulatory frameworks, and promoting best practices that safeguard both communities and ecosystems.

Sutton looks forward to engaging with UNEP, governments, industry partners, and civil society to drive meaningful progress toward a cleaner, healthier, and more sustainable future.
